

MUTO COMFORT

A versatile, multifunction sliding door system

The MUTO Comfort system is designed for glass, wood, and metal doors weighing up to 330 lb (150 kg). With user-friendly options to customize solutions, the sleek mechanisms stay out of sight behind a compact header. Not certain what features you need? No problem. Practical assembly kits allow some options to be retrofitted* as your needs change.

MUTO Comfort options

- Mechanical self-closing action
- DORMOTION damping mechanism; no glass preparation required
- Door position status indicator connecting to your facility management

* The DORMOTION and status indicator options can be retrofitted.

Installation

MUTO Comfort systems can be wall, ceiling, or glass mounted

DORMA USA, Inc.
 Dorma Drive, Drawer AC
 Reamstown, PA 17567
 800-523-8483

Comfort Configurations

MUTO Comfort system configurations include:

- **Single panel**
- **Double panel with Synchro** – the second door panel opens and closes automatically as the first one moves (not available with DORMOTION).
- **Double panel without Synchro** – the two panels open and close independently.
- **Telescopic** – for single or bi-directional panels where space is limited at either or both ends of door travel.

Cover finishes

- 150 Satin Anodized Aluminum

- 113 Anodized Similar to Satin Stainless (available 2016)
